

IN THE CLAIMS:

Add the following new claim(s):

44. (New) In a first mobile unit, a method for dynamic group call from the first mobile unit to a group of second mobile units via a network including a server, comprising the steps of:

dynamically selecting by the first mobile unit without the network a member for inclusion in the group of second mobile units;

determining whether a number of selected second mobile units is within a predetermined limit; and

if the number of selected second mobile units is within the predetermined limit, adding by the first mobile unit a second mobile unit to a list of second mobile units.

45. (New) The first mobile unit as claimed in claim 44, wherein there is further included a step of determining by the first mobile unit that the member is to be added to the group of second mobile units.

46. (New) The first mobile unit as claimed in claim 44, wherein if the number of selected second mobile units is not within the predetermined limit, there is further included a step of providing a message to the first mobile unit indicating a fault.

47. (New) In a first mobile unit, a method for dynamic group call from the first mobile unit to a group of second mobile units via a network including a server, comprising the steps of:

dynamically selecting by the first mobile unit without the network or the server the group of second mobile units;

determining whether a number of selected second mobile units is within a predetermined limit; and

if the number of selected second mobile units is within the predetermined limit, adding by the first mobile unit the second mobile unit to a list of second mobile units.

48. (New) The first mobile unit as claimed in claim 47, wherein there is further included a step of determining by the first mobile unit that the dynamic group call is adding the group of second mobile units.

49. (New) The first mobile unit as claimed in claim 47, wherein if the selected number of second mobile units is not within the predetermined limit, there is further included a step of providing a message to the first mobile unit indicating a fault.

50. (New) The first mobile unit as claimed in claim 47, wherein the step of adding by the first mobile unit includes a step of transmitting the by the first mobile unit the selected second mobile unit to the network.

51. (New) The first mobile unit as claimed in claim 47, wherein there is further included a step of determining whether the number of second mobile units exceeds a predetermined limit.
